PCB Webinar Series

#2 Development of PCB inventories

31 October

Zoom

2:00 - 3:30 p.m. (CET)

ENG-SPA-FR Interpretation

UNITAR developed the 2024-2025 PCB Webinar Series to raise awareness and enhance global and national capacities towards the environmentally sound management of PCB. This Webinar #2, "Development of PCB inventories," aims to introduce key technical and organizational aspects, as well as national experiences, in developing PCB Inventories, including considerations on Sampling, Screening, and Analysis. This event also serves to collect views and questions from participants to advance in the definition of topics for the following webinars of the series.
